I really dont understand what im doing wrong because its common behavior any ideas? Oct 7, 2012 What does this mean? I am receiving the following error on my Windows 7 machine: The procedure entry point \_\_mss\_stream\_sample\_volumes@@8 could not be located in the dynamic link library mss32.dll? The file is located in the system32 folder. A: There are various reasons, you could get this kind of error, (For those who are interested) The procedures may not be implemented in the dynamic-link library. In such a case, you will get an error indicating that the procedure entry point cannot be located. Missing or corrupted system files. The file or object is in use (e.g., by another process). To resolve this, please make sure that The Mss32.dll file is in the same folder as the DLL file. Make sure that the DLL file is not corrupted and is not missing. Run the following command: sc select mss32 This will set the system to select the Mss32.dll file. If this doesn't work, try uninstalling and reinstalling the Mss32.dll file. Please make sure that the directory containing the DLL file is not corrupted. It is very important to note that reinstalling the Mss32.dll file will not remove any settings or configurations already set up by the previous version of the DLL. A: I also had the same problem and found a solution. The module name was Mss32.dll. But when I searched the DLL mss32.dll I came across with a different one: mssdx32.dll. I found all the functions needed and the error went away. I wish this helps others Florian Gschwendtner Florian Gschwendtner (born 9 April 1969) is a retired Austrian long-distance runner. He won a bronze medal in the 10000 metres at the 1994 European Championships and finished seventh in the same event at the 1996 Summer Olympics. Gschwendtner also competed in the men's marathon at the 1998 IAAF World Half Marathon Championships and set a course record of 2:06:04 hours to finish in 5th place. Gschwendtner was the

Jul 22, 2015 I was trying to put the mss32.dll on the Jul 22, 2015 This is an error message. When you get this message, the mss32.dll file is missing and not in the file list. Please install the missing file and see if the game starts correctly. Ail set stream volume8 for GTAVICECITY.DLL Jun 22, 2013 I tried to play GTA Vice City online. I received this error message: "The procedure entry point "AIL\_set\_stream\_volume" could not be located in the dynamic link library "mss32.dll"... Please install the missing file and try to play again." Then I tried to install mss32.dll with create\_mss32\_dll.bat. And then I tried to install it again with PlayGtaViceCity.exe. I put mss32.dll in the C:/Windows/System32/ directory Then I got a new error message: "The procedure entry point "AIL\_set\_stream\_volume" could not be located in the dynamic link library "mss32.dll".... Please install the missing file and try to play again." I then tried to use the install\_mss32\_dll.bat. I put mss32.dll in the C:/Windows/System32/ directory but then I got the same error message: "The procedure entry point "AIL\_set\_stream\_volume" could not be located in the dynamic link library "mss32.dll".... Please install the missing file and try to play again." Please help me. A: Try this: Open the Windows run menu (Win+R then type run in the box, then press OK) Type regedit in the window and press enter. Go to "HKEY\_LOCAL\_MACHINE\SOFTWARE\Microsoft\Windows\CurrentVersion\Run" Click on Edit, choose New, and type the name for the new key as "mss32.dll" Click OK. Restart the computer. If that doesn't work, you might need to download a copy of the DirectX DLL. You can either search for a file online, or install an old version from here: f678ea9f9e
